

DR. CAROLINE LUCAS

Green Party  
for the South East of England

Member of the European Parliament

Peter Bottomley  
MP for Worthing West  
House of Commons  
London SW1A 0AA

*Dear Carmin  
Please do not judge anyone.*

*including me, or me EDM.*

*I seldom 'congratulate' the PM - March 7<sup>th</sup> 2008*

*Dear MP, those who said it should have adapted their words. Peter D.*

I was surprised and disappointed to learn that you have not yet signed Early Day Motion 736, which aims to make the Climate Change Bill more effective. *MD. Have you written about this I do that you appear.*

As you know the Climate Change Bill currently before Parliament aims to set legally binding targets for reducing the UK's CO2 emissions in order to prevent the worst impacts of climate change, in line with agreements made at UN and EU level. I share the view of the Government's former Chief Scientist Sir David King that Climate Change is the single greatest threat we face - and that that is the case in the South-East of England more so than most areas of the country. As I argue in my 2007 study 'Global Warming: The Worst Case Scenario' it is the most serious threat to the South-East of England, due to its long coastline and

Climate Change Bill as a first step towards  
constituting, but I fear it won't go far enough, for

key sectors - those which are making the fastest  
missions responsible for the problem.

can be measured in a legally enforceable way.  
able to hold future governments (of any  
except at election time.

ie. The Prime Minister himself has admitted that  
per cent demanded by the bill in its current

the house and, further, to make attempts to  
scribe. I believe this can most easily be done by  
points I describe and has already been signed by

[=34898&SESSION=891](#) and is reproduced in full,

signed the EDM, or explain to me why you feel

*With Compliments*

PETER BOTTOMLEY, M.P.
